

TRENDS

in LAMINATE

Arbor

WATER RESISTANT • REALISTIC • DURABLE

Trends in Laminate is a multi-layer flooring product comprised of an inner core, a photographic layer, and a protective layer that have been fused together through a lamination process. This production process is notable

for its resulting realism and durability, and these traits are on full display in the Woodland and Woodland Select collections. Woodland and Woodland Select pair captivating natural visuals with premium construction and water

resistance. The wide planks and embossed texturing of these floors bring natural allure to a space, and a range of on-trend colors offers endless design possibilities.

WOODLAND SELECT

water resistant laminate

WARRANTY

LIFETIME LIMITED RESIDENTIAL WARRANTY

WATER RESISTANT

Both of these collections are resistant to surface damage from moisture under normal use, and they can be maintained using a residential damp mop.

REALISTIC

Embossed texturing gives the floor a natural look and feel, and a carefully curated color palette reflects the tones of North American wood visuals.

DURABLE

With a wear layer rating of AC4, these sturdy laminate floors are strong enough to withstand light commercial or heavy residential traffic.
